

Dear company (customer)

the company Rotagral s.r.o. specializes in the production of:

- rotary switch,
- warning light (indicator),
- interval switch (wiper-speed switch),
- cable harnesses

for cars and lorries, tractors, mini tractors, trams, children small cars and for other machines and devices that are fed by safe alternating voltage up to 42.4 V or by safe direct-current voltage up to 60 V.

Technical description of rotary switch:

- from 2 to 5 positions
- button function possibility
- controlled using lever or button
- variation for harsh weather conditions
- installation of the switch onto the dash-board into an outlet D 16.2 mm with arresting slots, fixed by the nut M16 x 1
- the board thickness can be from 0.5 to 6 mm.
- maximum current: 16 A for 12 V or 8 A for 24 V

Types of rotary switches:

front and rear fog light switch
loudspeaker switch
engine brake switch
light switch
dimmed light switch
full light switch
light horn switch
bearing switch
acoustic horn switch
warning light switch
heating fan switch
internal lighting switch
front window deicing switch
ventilator fan switch
device lighting switch
windscreen wiper switch (with interval switch)
washer switch
internal heating switch
external lighting switch
rear window deicing switch
air-conditioning system switch
output shaft switch
auxiliary light switch
banner lighting switch
rear-view mirror warming switch
big interior lighting switch
internal lighting switch

retarder switch
heating switch (driver)
heating switch (passengers' area)
light siren switch
emergency condition switch
front drive switch
auxiliary headlamp switch
torque multiplier switch
bulb control switch of warning lights
seat warming switch
switch – battery switch
direction light switch
axial differential closure switch+ button function
pole change

Our production also includes installation of printed circuits, production of cable harnesses, wiper-speed switches, production of auxiliary electro-magnetic switches, moulding of plastics – injecting moulding machines and sets, production of contacts (both flexible and stationary), pointing of contacts, hot stamping (symbols on control buttons). We process aluminium, bronze, copper, brass, silver, plastic material. We also provide the tampon printing – advertising items, industrial components - symbols, logos, marks and labels both on plastic material and metal, glass, paper, wood etc. up to the dimension of 6 x 10 cm. We manufacture self-adhesive plates (labels), including bar codes and printing of variable data from the external databases.. We have the Quality Management System certified by the company NQA with the accreditation UKAS according to ISO 9001.

References – some of our current customers:

- TATRA TRUCKS, a.s.
- ZETOR TRACTORS, a.s.

If you are interested, we are ready to send you samples to judge.
